

Foundations of Robotics

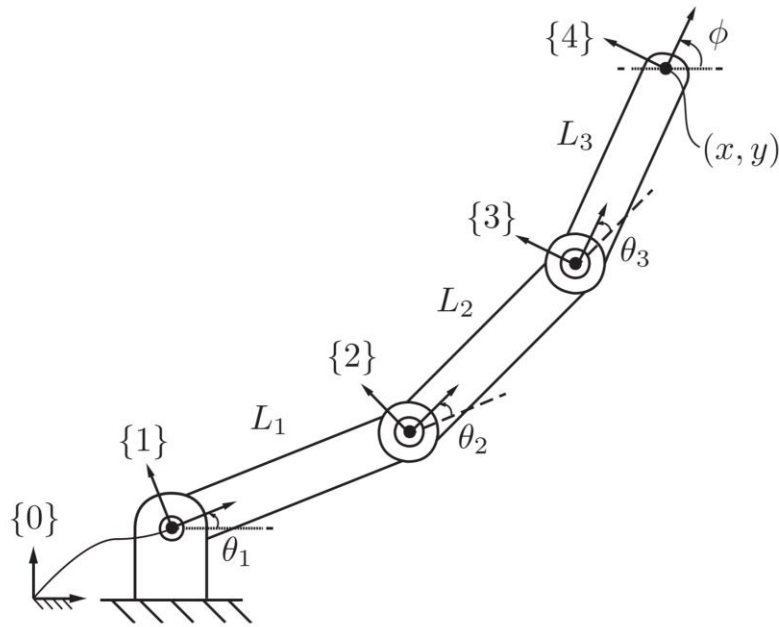

Homework 5

1. (Exercise 4.7) Please solve the exercise introduced as follows.

Exercise 4.7 The PRRRRR spatial open chain of Figure 4.13 is shown in its zero position. Determine the end-effector zero position configuration M , the screw axes $\mathcal{S}_i$ in $\{0\}$, and the screw axes $\mathcal{B}_i$ in $\{b\}$.

2. Please find the D-H parameters for the following mechanism. Please provide a set of frame assignment (drawn in the figure), and the associated parameters (summarized in a table).

3. Please find the D-H parameters for the following mechanism. Please provide a set of frame assignment (drawn in the figure), and the associated parameters (summarized in a table).
